Professional Summary

B.Tech CSE student at Aditya Engineering College (CGPA: 8.63/10, graduating May 2027) with a strong hold on **data structures, algorithms, and Computer Science fundamentals**. Experienced across the **full software development life cycle** building **scalable distributed systems** and **agentic AI applications** with **Python, React, Docker, and Kubernetes**.

Education

Aditya Engineering College, CSE Bachelor of Technology in Computer Science and Engineering	Jul 2023 – May 2027 (Expected) CGPA: 8.63/10
Sri Venkateswara Junior College, MPC Intermediate in Mathematics, Physics, and Chemistry	Jun 2021 – Apr 2023 Percentage: 93.8%

Experience

Full-Stack Developer Intern , Technical Hub Private Limited – Internship Letter - Engineered 5+ production pages and 12+ reusable components in React and Redux for a live client product serving 500+ daily users, cutting duplicate front-end code by 30%. - Delivered 8+ features across 3 sprints in a 5-member Agile/Scrum team, diagnosing and debugging 20+ high-priority issues in a production environment via Git-based code review. - Implemented responsive, cross-platform interfaces validated across 5+ screen sizes.	May 2025 – Jul 2025
---	---------------------

Projects

Capstone: Multi-Agent AI Sandbox Orchestration Engine - Designed a distributed microservice engine orchestrating specialized AI programming agents behind a Node.js/Express backend. - Provisioned isolated client execution spaces at runtime via the Node.js Kubernetes API client, generating dedicated Pods and Services per session. - Containerized services with Docker and shipped secure deployments on Kubernetes (K8s) with Ingress controllers and RBAC policies; managed CI/CD with Skaffold.	GitHub May 2026
Inquirol: Real-Time Contextual Search Agent - Architected a multimodal AI search interface using LangChain with dynamic fallback routing across LLaMA 3.3 and LLaMA 3.2 Vision models on the Groq LPU. - Streamed low-latency, token-by-token responses over Socket.io and structured live results from the Tavily API into source-cited markdown.	GitHub Live Mar 2026
DevTinder: Full-Stack Developer Networking Platform - Built a full-stack platform with real-time chat over Socket.io and MongoDB, exposing 12+ secure REST APIs and reducing invalid requests by 40%. - Secured endpoints with stateless JWT sessions; deployed the backend on AWS EC2 with Nginx at 99% uptime. Stack: React, Redux Toolkit, MongoDB, AWS (EC2, S3), Socket.io, Tailwind CSS.	GitHub Jan 2026

Skills

- Languages:** Python, Java, JavaScript, **SQL**, **Bash**
- Core CS:** Data Structures & Algorithms, DBMS, Operating Systems, OOP, SDLC (Agile, Scrum)
- AI / ML:** LangChain, LLM APIs, Distributed AI Agents, RAG, Prompt Engineering
- Web & Backend:** React, Redux Toolkit, Node.js, Express, REST APIs, Webpack, Tailwind CSS, MongoDB
- DevOps & Cloud:** **Docker**, **Kubernetes (K8s)**, **AWS (EC2, S3)**, Nginx, Git, Linux, Skaffold, Ingress, RBAC, CI/CD

Coding Profiles

LeetCode: 100+ problems solved	Profile
CodeChef: 200+ problems solved, rating above 1200	Profile
GeeksforGeeks: 60+ solved	Profile
HackerRank: 3 star Problem Solving, Java, SQL, C	Profile

Certifications

- Oracle Java Certification** – Oracle Academy (View) (2025) | **MongoDB Associate Developer** – MongoDB (View) (2026)
- GitHub Foundations** – GitHub (View) (2026) | **Python, C, OS, HTML, CSS** – Cisco Networking Academy (2024)
